

WOODS CHARTER SCHOOL 7TH & 8TH GRADE ELECTIVE OPTIONS

MS Theatre

Welcome to Middle School Theatre! Here, 7th and 8th grade students will learn how to expand on their ability to collaborate creatively with their classmates. They will experience the process of a play going from the page to the stage. They will gain confidence by performing for each other in a classroom culture that is challenging, safe, and encouraging. Most importantly, they will feel empowered to embark on artistic journeys that excite and inspire them both as individuals and as a group of peers. There is no such thing as good or bad acting in this class.

Chorus

Chorus is the group of singers in 7th and 8th grade. These students continue to sing as an ensemble and repertoire becomes more difficult as they continue to improve their singing technique. Student will have an opportunity to sing in a local judged festival or travel to sing with America Sings! festival. Students will sing a variety of repertoire and make music videos of the pieces they sing best. A capella music will be introduced as well. Select students will have opportunities to sing with all-state chorus or audition for North Carolina honors chorus.

Public Speaking II

Students will engage in a variety of learning activities, which will develop their speech writing skills, presentation etiquette, and their ability to critique speeches. Students will have a greater understanding of the different types of speeches, including introductory, persuasive and motivational. We will examine notable speakers and speeches relevant to each category of speech.

Investigation into Aquatic Science

Water is a unique substance that is a fundamental to life on Earth! In the first half of this course, we will investigate how water's unique properties allow life to exist.

We will investigate the geology of the ocean floor, how this influences waves and coastal ecosystems. The second half of the course, students will investigate the living organisms in the marine environment. We will start with the smallest, unicellular organisms (plankton) and investigate our way up to the largest marine mammals – whales. This hands-on, minds-on class requires an understanding of the preliminary work to appreciate the advanced material.

Main Inside Heading

The most important information is included here on the inside panels. Use these panels to introduce your organization and describe specific products or services. This text should be brief and should entice the reader to want to know more about the product or service.

You can use secondary headings to organize your text to make it more scannable for the reader.
